Applications

On-off control of water, air, oil and other media compatible with the materials of construction. All-stainless construction for superior corrosion resistance. Cycle times approx. 1 to 3 seconds per 90° rotation. Suitable for vacuum service to 29"Hg.

Operation

Double acting actuators use air pressure to open and air pressure to close the ball valve (4-way pilot). Spring return actuators use air pressure to open and springs to close the ball valve (3-way pilot). Actuator will work with filtered dry or lubricated compressed air. Air supply pilot pressure should be between 80 and 120 PSI. Easy to read visual valve position indicator located on top of actuator.

Description

Heavy duty stainless steel quarter turn rack & pinion actuators designed for long life and tested for a minimum 1 million operations. Investment cast 3-piece full port stainless steel body/ball for unrestricted flow and minimum pressure loss. Bolted body designed for easy maintenance. Adjustable live loaded stem seal packing helps compensate for wear, pressure or temperature fluctuations, extending the cycle life of the valve. Blow-out proof stem. Standard namur mounting pads for optional accessory confirmation switches, pilot valves and valve positioners.
