

### Features

- Full Port Lead Free Brass Diverter or Selector Valve
- Polyamide IP67 weatherproof enclosure with UV protection
- Multi-voltage capable with auto-voltage sensing
- Long life brushless motor with electronic torque limiter
- Anti-condensation heater
- Manual override and highly visual valve position indicator
- DIN plug style electrical connections
- 316 Stainless Steel ball and stem
- Two auxiliary limit switches to confirm valve position
- Energized PTFE ball seats for lower torque and longer life
- Leak free triple PTFE/FKM stem seal packing
- Certified per NSF372 and NSF61 for potable/drinking water

### Applications

Electric actuated flow diverter or selector valves are typically used to control the flow of water, air, oil and other media compatible with the materials of construction. Ideal where lead free and NSF approved construction are required for potable drinking water as well as general industrial applications. Suitable for vacuum service to 29" Hg. Actuator is designed for 75% duty cycle.

### Operation

Electric actuated valve uses power-to-open (Pos. 2) and power-to-close (Pos.1), stays in the last known position with power failure. On receipt of a continuous voltage signal, the motor runs and via a rugged all metal gear drive rotates the ball 90°. The motor is automatically stopped by internal cams striking limit switches. On receipt of a reversing continuous signal, the motor turns in the opposite direction reversing the valve position. Electrical wiring is directly to supplied DIN style connectors. Standard manual override can be used for setup and power failure situations.

### Construction

<b>Valve Body</b>	Lead free brass C69300
<b>Ball/Stem</b>	316 stainless steel
<b>Ball Seats</b>	(4) PTFE (Teflon) energized with FKM (Viton)
<b>Stem Seals</b>	PTFE (Teflon) with dual FKM (Viton) seals
<b>Actuator Enclosure</b>	Anti-corrosive Polyamide, IP67 weatherproof
<b>Position Indicator/Manual Override</b>	Dome style indicator/manual polyamide knob
<b>Fasteners</b>	Stainless Steel
<b>Auxiliary Limit Switches</b>	2 x SPST 3A@125/250VAC, 30VDC resistive load

### Description

Electrically operated Full Port 3-way L-type flow pattern ball valve has four energized PTFE ball seats, allowing for full pressure at any port. Leak free triple PTFE/FKM stem seal design. Corrosion resistant actuator includes a manual override, position confirm limit switches, thermostatically controlled anti-condensation heater, and over-torque protection. LED power on and diagnostic light.

### Approvals

#### Actuators

- CE mark conforming to: EN 60204-1:2006
- Machinery directive
- Low voltage directive
- EMC Compatibility directive

- ISO5211 valve mounting

**LEAD FREE**

#### Valves

- IAPMO RT certified to:
  - NSF/ANSI 372 - 2011 Drinking Water
  - NSF/ANSI 61 - 2015
  - Weighted average lead content  $\leq 0.25\%$
- Meets design MSS-SP-110

### Construction Features

### Pressure-Temperature

Ball Valve Pressure Rating: 400 PSI (27 Bar)\* non-shock  
29" Hg vacuum

Ball Valve Temperature Rating: -4 to 366° F (-20 to 186° C)

Actuator Temperature Rating: -4 to +158° F (-20 to 70° C)

\*See P/T chart

### Optional Functions

- DPS - Digital Positioner System valve position controlled by 4-20mA or 0-10V input control signal
- BSR - Battery Spring Return actuator fails to a safe position with loss of external power

### Pressure/Temperature Chart (PSI/°F)

P/T Chart						
PSI	400	400	400	400	375	275
°F	0	50	100	176	200	266

### Pressure/Temperature Chart (Bar/°C)

P/T Chart						
Bar	27	27	27	27	26	19
°C	-18	10	38	80	93	130

### Specifications (English units)

Stock Number	Pipe Size (NPT)	Orifice Size (inch)	Cv Flow Factor	Pressure (PSI)*	Cycle Time /90° (seconds) +/- 10%	Enclosure Rating	Max. Current Draw (Amps)			
							110VAC	240VAC	24VAC	24VDC
<b>24-240V AC or DC ELECTRIC ACTUATED 3-WAY LF BRASS BALL VALVE: L-PORT</b>										
568202E	1/4	0.4	3.2	400	9	IP67	0.30	0.16	1.28	0.97
568203E	3/8	0.4	3.5	400	9	IP67	0.30	0.16	1.28	0.97
568204E	1/2	0.6	4.5	400	9	IP67	0.30	0.16	1.28	0.97
568206E	3/4	0.8	10.0	400	9	IP67	0.30	0.16	1.28	0.97
568208E	1	1.0	16.0	400	9	IP67	0.30	0.16	1.28	0.97
568210C	1-1/4	1.2	31.0	400	13	IP67	0.43	0.21	1.98	1.63
568212C	1-1/2	1.5	49.0	400	13	IP67	0.43	0.21	1.98	1.63
568216C	2	2.0	82.0	400	29	IP67	0.33	0.18	1.50	1.22

These unique multi-voltage valves will operate within a voltage range of 24 to 240V AC or 24 to 135V DC, -0/+5%

Cv is the GPM of water at 60° F that will pass through the valve with 1 PSI pressure drop

\* Pressure at 176° F (reduced pressure at higher temperatures-see P/T chart)

### Specifications (Metric units)

Stock Number	Pipe Size	Orifice Size (mm)	Kv Flow Factor	Pressure (Bar)*	Cycle Time /90° (seconds) +/- 10%	Enclosure Rating	Max. Current Draw (Amps)			
							115VAC	240VAC	24VAC	24VDC

\* Pressure at 80° C (reduced pressure at higher temperatures-see P/T chart)

## Optional DPS - Digital Positioner

The DPS Digital Positioner System is available as a factory installed option for Valworx 5610 series electric actuators. Installing the DPS kit will change a standard On-Off type electric actuator to modulating or proportional control. This will allow positioning of the actuator output drive anywhere between 0 and 90° using either a 4-20mA or 0-10vdc input command signal. When using an electric actuated valve with DPS option, the output flow can be adjusted anywhere between 0-100%.

The DPS kit contains a microprocessor based control board and mounting hardware. The control board continuously monitors the analog input and output signals and compares them to the actual physical position of the output drive. An electric motor/gear drive moves the actuator output drive as required to balance the signals and find the desired position. The digital microprocessor ensures highly sensitive and repeatable control. The DPS is installed inside the actuator, under the red cover.

The DPS system provides an accurate valve positioning function whereby the movement of the actuator is controlled by either a 4-20mA or 0-10vdc control signal. Any change in the control input signal results in a corresponding and proportional change in the position of the actuator (valve).

The DPS positioner has auto-calibration, no need to adjust zero and span settings. An output monitoring signal, in the same format as the input signal is also provided to confirm the output drive position (ex: 4-20mA input, 4-20mA output).

The standard DPS actuator will fail closed with loss of the control signal. Actuator can also be setup reverse-acting (4ma or 0v = open) and fail open with loss of the control signal. These electric actuators will fail in place with loss of external power.

### DPS Positioner Kit Ordering

Kit Stock No.	Input Signal
561101E	4-20mA
561102E	0-10V

- Kits are a factory installed option. The DPS kit is automatically installed and tested when ordered with an actuated valve.

Rotation	0-90°
Input Signal	4-20mA or 0-10vdc
Output Signal	4-20mA or 0-10vdc
Accuracy	3% Full Scale
Linearity	2% Full Scale
Hysteresis	3% Full Scale
Steps	4/20 mA: Min. 150 steps, 0-10V: Min. 98 steps/ 90°
Impedance 4-20mA	100 Ohms
Impedance 0-10vdc	13K Ohms

Note: Overall accuracy of a valve assembly will vary depending on the type of valve selected and how the valve is mounted to the actuator. Output signals will be in the same format as input signal (ex: 4-20mA input, 4-20mA output).

## Optional BSR - Battery Spring Return

The BSR– Battery Spring Return kit is available as a factory installed option for Valworx 5610 series electric actuators. The BSR kit will work with both on-off models and actuators with DPS positioners. The battery failsafe system provides an alternative source of power to drive the actuator to a preset failsafe position in the event of an external power failure. The industrial quality battery is constantly trickle charged during normal operation to assure maximum charge when required. The battery kit is installed under the actuator cover. No separate modules or boxes are required.

In many applications, the BSR battery spring return function tends to be a very economical option when compared to the alternate true mechanical spring return actuator. Valworx actuators with the BSR option are much smaller, lighter and less expensive.

The installed BSR kit will provide enough power to move the actuator/valve to a failsafe position with loss of external power. The kit can be ordered as fail closed or fail open as required.

The actuator operates in the normal power open and power close mode while external power is available. Internal circuitry monitors the incoming main power and automatically switches within a few seconds to the battery backup with loss of external power. The battery will then provide enough power to move the actuator to a failsafe position. Under normal operation the external control power will trickle charge the battery and maintain a full charge.

In the normal mode of operation, an LED status light located on top of the actuator cover will be continuously lit. With a loss of power, the LED status light will blink slowly. On resumption of external power, conditional that the actuator control signal remained unchanged, the actuator will reset to the position it saw at the time of the main power failure.

### BSR Kit Ordering

Kit Stock Number	Description
561104E	5610 BSR Battery Spring Return Kit, Fail Closed (pos 1)
561105E	5610 BSR Battery Spring Return Kit, Fail Open (pos 2)

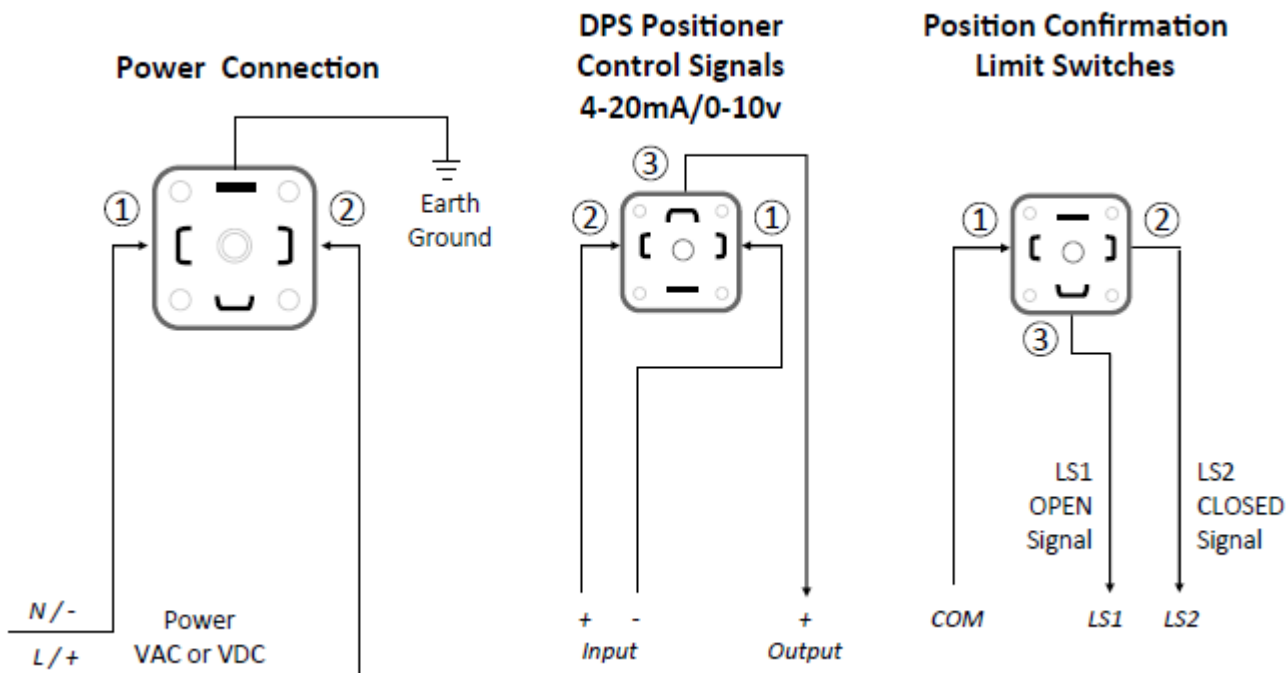

- BSR kits are a factory installed option

Valworx Actuator with BSR Option	1/4 to 1" NPT	1-1/4 to 1-1/2" NPT	2" NPT
Working operations without recharge, with 100% initial	10	10	10
Recharge time per working operation	15 min	48 min	58 min
Full Charge Time 100%	28 h	28 h	28 h

## Electrical Wiring: On/Off and BSR Battery Spring Return Versions

Voltage: 24-240 Volts AC or DC, 1 ph, - 0/+ 5%

Auto-voltage sensing

### Function: Actuators with DPS—Digital Positioner Option

Power open, power close - actuator movement controlled by 4-20mA or 0-10VDC input signal.

Standard operation: 4mA or 0V = actuator closed, 20mA or 10V = actuator open (can be set-up reverse acting).

Actuator closes with loss of control signal, stays in last known position with loss of main power.

Output monitoring signal (in same format as supply signal) provided as standard.

### Function: Position confirmation limit switches

Dry contact 3A @ 125/250 VAC, 30VDC resistive load

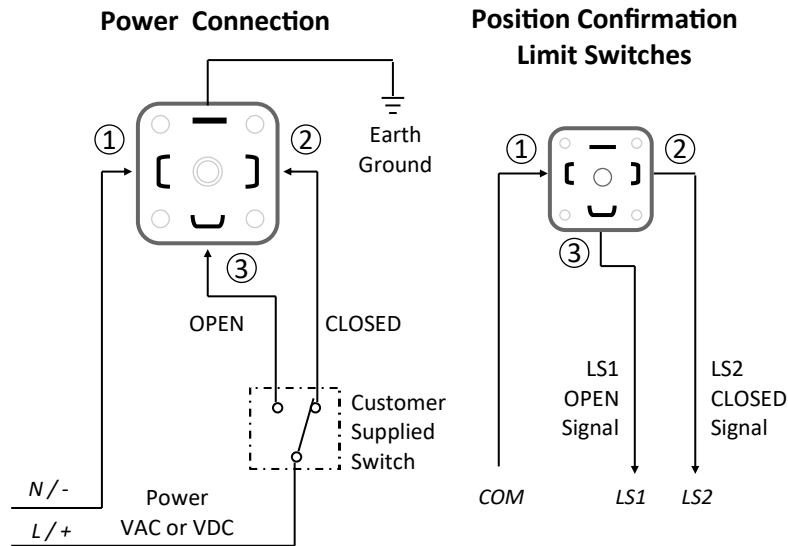

PIN 1 (COM) and 2 to confirm actuator is closed

PIN 1 (COM) and 3 to confirm actuator is open

## Electrical Wiring: On/Off and BSR Battery Spring Return Versions

Voltage: 24-240 Volts AC or DC, 1 ph, - 0/+ 5%

Auto-voltage sensing

### Function: ON-OFF version

#### Power Connections

Power to PIN 1 and 2  
- actuator CLOSED

Power to PIN 1 and 3  
- actuator OPEN

Stays in last known position  
with loss of power.

### Function: ON-OFF version with BSR option

Wiring is the same as standard ON-OFF version.

Power to open, power to close - maintain power to trickle  
charge the battery system in either open or closed position.

Actuator sent by battery power to failsafe position with power  
failure.

Actuator returns to pre-failure position on power resumption.

### Function: Position confirmation limit switches

Dry contact 3A @ 125/250  
VAC, 30VDC resistive load

PIN 1 (COM) and 2 to confirm  
actuator is closed

PIN 1 (COM) and 3 to confirm  
actuator is open
